

## **Section 6.6 Notes**

### **Commands**

For the tests to pass, you will need to rerun the training script to ensure the correct .pkl file is present (make sure your PYTHONPATH includes the top level regression\_model directory):

## Training the model (Windows):

python packages\regression\_model\regression\_model\train\_pipeline.py
(OS X/Linux)

python packages/regression model/regression model/train pipeline.py

# Running the tests, make sure you install pytest first: (Windows)

pytest packages\regression\_model\tests -W ignore::DeprecationWarning

## (OS X / Linux)

pytest packages/regression\_model/tests -W ignore::DeprecationWarning
